

# Innovation for Sustainable Sheep and Goat Production in Europe

## Holistic approach to improving European sheep and goat sectors

#### **AIMS**

**iSAGE** will improve the overall sustainability and innovative capacity of the sheep and goat sectors in Europe. This will be achieved by:

- Enhancing the efficiency and profitability of the sector in the long term.
- Meeting the needs of consumers.
- Increasing its societal acceptance and improving the delivery of ecosystem services.

#### WHAT WE WILL DO

**iSAGE** will develop new socio-economic, animal welfare and sustainability assessment tools for the whole supply chain in order to:

- Understand barriers to innovation and development.
- Define future opportunities for a competitive edge.
- Develop farm management tools and innovative breeding strategies.
- Develop solutions for social, welfare and consumer issues.
- Work with industry to inform, help and teach.

#### **EXPECTED OUTCOMES**

**iSAGE** will provide solutions to redesign sheep and goat systems that will result in:

- Improved sustainability and innovative capacity of the sector.
- Enhanced consumer and societal acceptance.
- Increased consumption of products.
- Optimising efficiency and profitability of production.
- New efficiency traits to enable selection of animals more adapted to environmental changes.
- Increased animal welfare.
- Improved social well-being and rural development.

### Multi-actor approach with industry and research organisations working together to keep results relevant.

**iSAGE** consortium is comprised of 33 partners from 6 EU countries and Turkey

- 19 industry partners representing ~ 16,000 farmers and ~
  5.5 million sheep and goats
- 14 diverse research partners

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 679302.
